

Dashboard: We are looking to make an analytics dashboard that applies to each of our own individual projects. Different tabs will show a collection of different stats and/or graphs based on specific groupings of data such as teams or players. These collections of stats will all specifically pertain to each of our projects.

Pipeline Code - This consists of gathering and cleaning the data and formatting in an easy way for the dashboard (code) to use. We will be writing a few scripts for each source of data that will produce clean csvs that will be used within the dashboard.

Deliverables	Person	Work share
Dashboard	Gus	25%
	Matt	25%
	Ram	25%
	Hannah	25%
Contract Linear Regression Modeling	Ram	100%
Gathering Data from Sports Reference	Hannah	50%
	Ram	50%
Documentation	Matt	50%
	Gus	50%
Pipeline Code	Gus	25%
	Matt	25%
	Ram	25%
	Hannah	25%
